**GET STRONGER
AT CENTERS**

Centers Health Care is the most complete post-acute health care network in the Northeast. With numerous facilities in 4 states, every facility in the Centers Health Care continuum excels at rehabilitation and therapy as well as nursing home care. Our unified mission: getting you stronger.

The Wound Care & Management Program

CENTERS

**WOUND
CARE**

Your Experience

We want to put you at ease. Our focus on wound prevention and management, as well as on pain relief, is designed to make you as comfortable as possible. We provide an environment that promotes and supports wound treatment and healing.

Your Team

Our team of wound-specialist physicians, nurse practitioners, and registered nurses assess not only your wound, but your complete health condition. Optimum wound management is achieved by assessing the patient as a whole; consequently, we conduct a thorough history of each Resident which includes: physical exam, nutritional assessment, pain level evaluation, Braden Scale Assessment (risk of skin breakdown), and Resident's compliance and self-care ability.

Managing all types of wounds, including surgical, diabetic, vascular, and pressure ulcers, we have expertise in wound debridement, wound dressing, anti-infectives, negative wound pressure devices, low-air mattresses for pressure relief, as well as nutritional supplements.

Your Outcome

Our ultimate mission is to implement leading edge treatment—accompanied by an ongoing process of assessment, clinical decision making, intervention and documentation. Our holistic, clinical approach to wound prevention and management has resulted in successful outcomes for even the most complex cases. And we never forget why we're here: to provide our residents with the optimum in health care, the most comfortable environment, and the best amenities possible.

We're here for you:

- Wound care specialist physicians available 24/7 with weekly rounds
- Weekly team meetings with the entire interdisciplinary team
- Dedicated nurses and a unit manager assess wounds daily
- A full-time nurse practitioner to assist in all our inpatient wound care treatments and needs
- Advanced wound care
- Antibiotic therapy
- Vacuum assisted closure therapy
- Pain management
