**Comprehensive treatment/
Consummate care**

CENTERS

DIALYSIS CARE

Customized home dialysis

You don't have to travel back and forth to a dialysis facility, spending hours away from your home and family. Our training and support staff can design a home dialysis program specifically for you, giving you independence and flexibility. The benefits include less stress, more mobility, and our continued support. Contact us for additional information.

Convenience

Residents have access to the onsite Dialysis Center without ever having to leave the building. It's right inside the skilled nursing facility. No more concerns about cold, damp winter weather or congested roadways—the lifesaving procedure is just an elevator ride away. In other words, we're here to accommodate your schedule.

Compassion

Our multilingual, interdisciplinary renal care team—comprised of a board-certified nephrologist, registered nurses, a renal dietician and certified social workers—ensure that each resident receives the best possible care and individualized medical attention.

Commitment

Our commitment to restoring and maintaining the health and well-being of our patients doesn't end when they leave the room. Improved diet, better fitness and continuing education about alternate treatment options and how to live and work with the disease are all integral parts of the program.

A full spectrum of renal services and amenities

- Clinical safety and quality assurance support all aspects of our professional care
- Conveniently located right in the facility
- In-Center as well as at-home Hemodialysis training and support
- Getting dialysis patients back to the activities they enjoyed before kidney disease
- A high staff-to-patient ratio
- Comfortable dialysis recliners with heat and massage functions
- Personal smart TVs
